

with Camp Imagination

**A partnership with the Department of Recreation
and Department of Public Works and Transportation**

Start the summer off on the right foot by Going Green!

Camp Imagination will explore personal responsibility for the Earth, and how to assess our impact on the environment. We will study recycling, composting, waste reduction and more to learn environmentally-responsible behaviors for camp and home! Campers will use hands-on activities including camp games, songs, creative movement and crafts to enhance the learning experience.
